

WIRE INDUSTRIES
2020 PRICE LIST

Steel Reinforcement
Institute of Australia

Our customers can rest assured knowing Wire Industries reinforced steel products are independently certified by Australian Certification Authority for Reinforcing Steel (ACRS) - Australia's leading third-party quality assurance authority.

We use the highest quality, locally produced, environmentally friendly reinforcement raw steel material from Australian steel mills. Each steel mill Wire Industries partners with is ACRS certified. We also only employ skilled Australian workers to manufacture our products at our various branches around Australia.

Next Generation Reinforcing Solutions

Wire Industries adopts world leading automatic machines for reinforcing steel processing, proven-technology for production of resistant-welded reinforcing mesh and industry specialized German software technology for our bar scheduling which is fully integrated with our production facilities to provide 100% traceability from raw material to every bar on job site.

WIRE INDUSTRIES

**“Wire Industries
has grown to
become one of
Australia’s leading
suppliers of
reinforcing steel
products and
services.”**

Stock Reinforcing Bar

Reinforcing Deformed bar is used where extra reinforcing is required to fabric sheets, trench mesh, concrete structure element or swimming pool reinforcement application. Wire Industries stock AS/ NZS4671:2019 N-grade, 500 MPa deformed bar (D500N) and 250MPa deformed bar (D250N) in standard lengths.

Processed Reinforcing Bar

Item No.	Description	UOM	Unit price
Reinforcing Bar Processed			
RBPRO	Reinforcing Bar Processed (Cut, bent bundled, and tagged. Diameters 12 - 36mm. Max length 12.0m, Max bends per bar 4 and according to our Standard shape list.)	KG	\$2.50
Reinforcing Bar Fabrication			
RB FAB	Reinforcing Bar Fabrication (Tack welded Prefabricated round cages)	KG	\$1.50
Reinforcing Bar Galvanising			
GALV	Galvanising Charge High-quality galvanising meet AS/NZS4680	KG	\$2.25

We can help with complex bending, three dimensional bending and other complex reinforcement bending of anti-burst spirals, top hats, circular rings and radius bars.

Corner & Starter Bars

Reinforcing Bar complies with AS/NZS 4671:2019 and is processed in accordance with AS3600 and quality assured by ACRS.

Rectangular Mesh

Our Rectangular Rib Mesh is manufactured from L-grade ribbed wires (D500L) in compliance with AS/NZS4671:2019 and quality assured by ACRS. Ribbed wire are resistance-weld together with unequal spacing in each directions to form rectangular apertures. Rectangular Rib Mesh is used when more strength is required in one direction, such as floor slabs and walls stocked in 6m x 2.4m.

Item No.	Description	UOM	Unit price
Rectangular Mesh - Standard sheet size 6.0m x 2.4m

Bar Chairs & Spacers

Bar chair and Spacers for concreting provide support for both reinforcing mesh and bar, ensuring that the correct cover of concrete over the reinforcement is achieved. Wire Industries stock a full range of spacers, chairs and supports in different styles and materials including plastic, wire and concrete.

Tie Wire

Our tie wire range offers different options for you to tie your reinforcing steel. Our bag tie will pair with your preferred twister, the simple pre-cut straight tie wire can use in any situation and our most popular belt pack for your everyday use. Made from strong durable, slightly oiled, anealed steel wire, this wire is perfect for tying off reinforcing and our belt pack fits neatly into the Belt Pack Tie Wire Reel.

Trench Mesh Fitment

We can supply a full range of ligatures (fitments) manufactured from round reinforcing bar, grade R250N, to suit all requirements. Commonly used to separate top and bottom layers of Trench Mesh in residential slabs or for fabricating beam or column cages. Common square and rectangular shapes in 6mm and 10mm bar are listed below. We can manufacture other shapes and sizes to order. All our ligatures meet AS/NZS 4671.

Item No.	Description	UOM	Unit price

Polythene Film

Polythene film is a high quality heavy duty LDPE film that can be used for a variety of purposes and most often used as a moisture barrier and concrete underlay. To ensure integrity of the waterproofing for the concrete slab all lapped joints can be sealed with duct tape. It can also use for temporary weather protection or screening areas on job site.

Item No.	Description	UOM	Unit price

Duct Tape			
PTR	Duct Tape 48mm x 30m	ROLL	\$7.10

Joint Filler & Joint Formers

Flexible Expansion Jointing is used in all standard concrete constructions such as driveways, footpaths and floor slabs. The jointing assist in preventing cracks and breakages in slabs, which are often caused by the expansion and contraction of concrete due to changes in climatic conditions.

Concrete joining products work to allow controlled movement in concrete slab joints, to control and prevent the cracking within the concrete slab and to form contraction joints in concrete slabs.

Item No.	Description	UOM	Unit price
